The truth is that we are all idealists in here. Why should we fight for truth if the "owner" does not want to? What would this fight bring to us? Glory? Money in consulting business, programming or system management? We are all over 50 (well, more or less). Depending on the countries where we live, we'll stop working in 5 to 10 years time.

This fight is a Last Mohican fight.

I strongly consider giving up with VMS services and purchase a shop where I would sell what Customers need to buy every day.

D.

(PS: The PS (Socialist Parti) won 20 against 22 regions in France yesterday. Maybe I should emigrate too...)
