Hello,

I suppose I have made a mistake... I'm trying to create a normal account. Thus, I have made :

```
$ define/system/trans=(concealed)/exec disk$users dka0:[users.]
$ set default disk$users:[000000]
$ create /directory bertrand
$ set default sys$system
$ run authorize
UAF> add bertrand/password=mypassword /device=disk$users -
_UAF> /directory=[bertrand] /owner="BERTRAND Joel" /nopwdexpired -
_UAF> /nopwdexpiration
```

```
UAF> show bertrand
Username: BERTRAND Owner: BERTRAND Joel
Account: UIC: [200,200] ([DEFAULT])
CLI: DCL Tables: DCLTABLES
Default: DISK$USERS:[BERTRAND]
LGICMD:
Flags: DisUser
....
No access restrictions
....
Login fails : 13 !
....
Authorized privileges
NETMBX TMPMBX
....
```

I have tried to use this account, but I cannot perform any login (CDE or remote login by SSH) :

```
cauchy:[~] > ssh -l bertrand dirac
bertrand@dirac's password:
Permission denied, please try again.
bertrand@dirac's password:
Permission denied, please try again.
bertrand@dirac's password:
```

Account creation

Permission denied (publickey).

cauchy:[~] >

I have tried to use /nopassword without success. Where is my mistake ?

Regards,

JKB
