In case someone has missed my previous posts on this, I'll be in England next week and 10--12 August I could collect used DEC stuff. I'm looking for additional and/or spare parts for my hobbyist cluster, especially SCSI-1 or SCSI-2 (fast, narrow) disks in the 1--18 GB range, SBB or "internal" disks.

If you have stuff you would rather see go to a good home rather than be thrown out or sit around doing nothing, let me know!
