I am trying to do a complete system recover back to factory settings,

My system recover disc set is 3 discs, but when I try to do it, it only ask for 1 of 2 and 2 of 2, it never ask for the third disc and it never restores back to factory settings, it only does an application recovery even though i select complete erase and restore to factory settings.

I never even have to re-enter the windows key or anything, it says it complete's but when it starts its the same old desktop wallpaper and app's and shortcuts. No restore back to factory

if it's any help, its a Pavillion XL753, with a 700 MHZ Celeron and Windows ME about 2 years old

Last time I did this it worked fine and asked for all 3 CD's and the windows Key and restored it back to factory.....I have tried a clean restore 3 times now it as many days and still the same.....Disc 1 of 2 and disc 2 of 2 and no restore

any suggestions?
