The qfe is not supported in Solaris 9 and I'm not sure when support was dropped. I have one here, but it is next to useless.

Are you sure you don't mean 'qe' (no driver in S9 and later).

"qfe" in both Sbus and PCI forms is still supported in S10.

Casper

Probably. I just tried looking for the card, but I think I threw it out, but I know there was no driver in Solaris 9, so I guess it was qe. I bought it on eBay, thinking it was hme, but no such luck.

Re: sbus card for 10/100BaseT ethernet in a sparystation 10?

for a couple of months only. Later set it manually. The month is
always written in 3 letters (e.g. Jan, not January etc)
