AIXers,

I am running AIX V5.3 on a 9113 p5-550.

I remember receiving or viewing a procedure on how to send an email to root when certain errors are received. For example, an email is sent to root when a tape drive needs cleaning.

Does anyone know how to create this sort of procedure?

Thanks In Advance,

The easiest way is to check the error log and email yourself any new entries.

With 5.3, you can use websm to monitor many conditions.
