How do I get percentage CPU usage of processes for a specified time interval?

I'm wish to write a script, part of which displays the top 10 processes by percentage processor usage over a 30 second interval. I know "topas" can show this, but I need to be able to process the information in a script. The output from "ps" doesn't seem to give the necessary resolution...

Can anybody give me some pointers as to how this can be done?

Many Thanks,
=Adrian=
