SCO OpenServer 5.0.7 Desktop, MP3

After installing the operating system I try to run
/usr/lib/docview/conf/rundig -i to setup indexing in Docview.

I get the error:

```
htmerge: unable to open word list file  
'/usr/lib/docview/db/db.wordlist'
```

Any pointers on how to resolve this and complete the indexing is appreciated.

TIA,

DDinAZ
