Hello,

I'm a student who would like to run an instant messenger. I've gone through jabber clients with no success and someone told me to give aim a shot. I feel like I've given it an honest chance, but I'm not having any success. I have searched this group for answers, but none have yielded success.

```
ray $ uname -a
SunOS ray 5.8 Generic_108528-15 sun4u sparc SUNW,Ultra-60
```

I have pkg-config installed to \$HOME/src/pkg/bin

glibc-2.0.0 compile returns

```
./configure --prefix=$HOME/src/gtk/ (no errors)
```

make

```
&& CONFIG_FILES=docs/reference/glib/Makefile CONFIG_HEADERS=
/bin/bash ./config.status
config.status: creating docs/reference/glib/Makefile

```

Trying to install gtk for gaim on sunray account.

comp.unix.solaris: Trying to install gtk for gaim on sunray account.

yields everything in \$HOME/src/gtk/pango-1.2.0/ but nothing anywhere else.

Any hints would be greatly appreciated.

Christian
