I don't see any objections skipping Solaris 8.....

If your memory is sufficient (Solaris 7 has min. of 32 Meg; Solaris 8,9 have min. of 64 Meg) it should be no problemo.

Regards,
Eddie

> *I'm currently running Solaris 7 and looking to upgrade now that 9 has become available for download. Would it be wise to go to 9 and skip 8 for an Ultra 2 300mhz box? Do the later releases include bloat that will cause the O/S to run slower on older hardware? Can I choose to not install the Gnome crap? Thanks in advance for any answers.*
